

## ACL TC200 Temperature Controller

### ACL TC200 Temperature Controller

The **ACL TC200 Electronic Temperature Controller** is designed for accurate temperature monitoring, calibrating and control of industrial heating applications. The two independent 4 to 20 mA analog signals combine local temperature control, and remote temperature monitoring as well as two digital outputs for shutdown and temperature control.

**Provides reliable monitoring and control of process temperature with alarm and shutdown features**

**Two independent temperature switch points**

**Two independent temperature transmitter signals**

**User adjustable set points and deadband**

**Large, easy to read digital display**

**Celsius and Fahrenheit display**

**Solid-state design**

**Class 1, Div 2 location**

**Simple to use and easy to install**

**Type 4X enclosure-corrosion resistant and weatherproof**

**Low power consumption**

**Available for 12/24 VDC and 120/240 VAC power supplies**

1-877-638-5234

805 Main Ave. W Sundre, AB T0M 1X0
