

# RUSH BURNER

## Preassembled Burner Packages

### PATENTED

### Preassembled Burner Packages

The BGR Rush Burner Package is designed to provide an all-in-one combustion solution for tank heaters, free water knockouts, boilers, line heaters, de-hys, and treaters. The pre-assembled packages integrate a BGR flame arrestor, fuel valve train, ACL

burner management controller, and an ACL high-efficiency burner assembly. All Canadian BGR Rush Burners comply fully with all CSA B149.3 standards. The BGR Rush Burner systems are fully leak and function tested (with any pressure switches pre-set) and increase operator safety and drastically reduces installation time, resulting in significant cost savings. The BGR flame arrestor is classified as Group D (IIA), promoting optimal fuel to air ratio, clean air supply, and lower noise pollution.

### Available US Models:

Rush 500, Rush 1000, Rush 2000, Rush 3000, and Rush 5000.

### Available Canadian Models:

Rush 500, Rush 1000, Rush 2500, and Rush 5000.

### Package Options:

- BMS Controller: ACL CSC200 or ACL CSC400
- ESD Valves: Asco or Peter Paul
- Voltage: 12VDC or 24VDC
- Solar Package with regulator, batteries, and solar panel
- Spool Extension
- Hinge Left or Hinge Right

(model numbers indicate BTU of heater: 500 = 500,000 BTU, 1000 = 1M BTU, 2000 = 2M BTU, etc.)
